Engage with botany friends

Features

- Live map placement and database updates
- User contribution, verification, and discussion
- Verified plant data from OSU's Department of Horticulture

Methodology

- Users upload plant images and location, and describe the features of the plant.
- Users can choose the plant which they believe most accurately describes their findings.
- The system stores the data and dynamically updates the interactive map.
- Trusted users can moderate content and determine if the plant identification is accurate.
- Users can like and comment on other users' plant entries, encouraging engagement around OSU's plant life.
